Projects

Kafei

[live site](#) | [github](#)

Python , Flask , JavaScript , React / Redux , postgresSQL , Sass , AWS S3 , Docker , Heroku

A user-friendly web app for users to post photos, interact, and buy coffee for their favorite content creators.

- Connected Flask backend to AWS S3 for multimedia storage to optimize scalability and reduce server load
- Implemented user authentication to allow users to login and signup with a Python / Flask backend and JavaScript / React frontend
- Implemented Google Maps API and Geolocation API to show user locations and pinpoint actual location.
- Introduced improvements in efficiency and complexity to the architecture of Buy Me a Coffee's current stylesheets through the use of the SASS pre-compiler.

Busker

[live site](#) | [github](#)

JavaScript , Python , Flask , Reactjs / Redux , postgresSQL , Sass , HTML , CSS3 , AWS , Heroku , Webpack

A web app inspired by Bandcamp, where users can stream music and tip their favorite artists.

- Integrated persisting music player with Redux's global store by dispatching actions only when sharing information across components and encapsulating music player data to give the user a seamless, uninterrupted experience.
- Incorporated React-Redux container and Redux selector patterns to architect highly scalable and uni-directional front-end state management.
- Implemented custom search using redux.

Readium

[live site](#) | [github](#)

JavaScript , Express , PUG , Node.js , postgresSQL , Sass , HTML , CSS , AWS , Heroku , Webpack

A web app inspired by Medium, where users can create, comment, and like each other's articles about their favorite books.

- Implemented backend user authentication using express-validators, showing custom errors for each input when not entered appropriately.
- Collaborated with team members to create tables and set up relationships amongst them for a smooth implementation.

Experience

District Manager | Aug 2019 - June 2020

Automatic Data Processing, ADP

- Managed the Seattle/Edmonds district with a list of 500+ clients and provided working solutions for customer satisfaction using our technology
- Prepare and execute presentations / tech demos, and provide solutions to customer inquiries
- Led demonstrations for our technology to our premium wholesale partners with 50+ clients.
- Monitor market conditions, product innovations, and competitors products, prices, and sales.

Education

App Academy | June 2020 | New York, NY

Immersive software development course with focus on full stack web development with <3% acceptance rate

University | June 2019 | Seattle, WA

University of Washington, BA in Business Marketing & Management
